

## Observation of self and others when working with a telepresence system

**You have had a telepresence system in the classroom for a few weeks, and a pupil with a chronic illness is connected to the school via the telepresence system. Please reflect on your teaching experience with the telepresence system by taking observation notes after or during a lesson.**

Method in this lesson:

Content of this lesson:

Learning objectives of the lesson:

### Lesson preparation

To what extent was the lesson prepared for the pupil using the telepresence system?

What was successful today?

### Pupils' activity

In which situations was the pupil particularly active via the telepresence system today?

What was particularly noticeable in this situation?

The following aspects can be specifically focused on:

### **III pupil-teacher interaction**

What was remarkable:

### **III pupil-pupil interaction**

What was remarkable:

### **Buddy system for the ill pupil**

What was remarkable:

### **Any other aspects of your lesson today**

What was striking:

### **Next steps**

These are the next steps for the coming lesson or week:
